STANDARD STN-8

#### **Copyright Risk Assessment Criteria**

**Last updated:** May 27, 2015 (v1)

#### **Purpose**

Use these criteria when deciding whether or not to disseminate thirdparty protected materials over the Internet via the Archives' online access system.

- Low-risk materials Archives may disseminate without requiring the copyright owner's permission.
- High-risk materials Archives will seek copyright owner's permission be.006 Tc45 0 0 45 0 0 Tm / TT2 1 T ( S 0 0 45 0 0 Tm / TT2 16451q 0.(t) 45 0 0 45 0 0 0 29.6cm (2) (ow) ]TJE0.(n (n')321.6cm IB45 0 0 45 0 0 Tm /

Criterion Application Indicators of high risk Materials to watch for	Criterian	Application		Materialstowatchfor
--	-----------	-------------	--	---------------------

# 1. Owner's economic rights

Materials are high-risk if:

There is a reasonable possibility that the material has a commercial value and online dissemination

Criterion Application Indicators of high risk Materials to watch for	
--	--

## 3. Owner's history of copyright defence

#### Materials are high-risk if:

The copyright owner of the material is known to have a history of actively defending their copyright and online dissemination without permission could expose the university to liability for claims of infringement.
