

Let's explore Computing Science together! Join the new CMPT 115 course!

We will explore fundamental ideas in Computing Science, and the far-reaching impact of computational thinking on modern society. Programming is not the focus, but you will do a bit of programming to actively experience the computational point of view on the world, creating applications in AI and robotics using friendly visual programming languages.

This course is meant for students pursuing a degree in any discipline, including Education and Continuing Studies; it has breadth Science designation. No background in computing science or
