

DRAFT CITATION - GORDON ATHERLEY

In the harnessing of nature for energy and in the exploitation and processing of materials for the use of

~~provided the means for a better way of life for man in the world~~

force. Gordon Atherley, you discovered the truth of this situation the hard way, when, as a student, you were gassed in an industrial accident in a bleach works in your native England.

Such changes govern our lives. You went into medical school at Manchester University, then into research, and eventually specialized in occupational medicine, which has occupied you ever since.

Your success in this appointment led to your next, as head of the Occupational Health Division and Occupational Medical Officer for the Province of Saskatchewan, and then to your present appointment as President of the Canadian Centre for Occupational Health and Safety, with the equivalent rank of Deputy Minister in the federal public service.

Organisation have put you in demand by governments and universities all over the world - in Australia, South Africa, Belgium and Ireland. You have been made a fellow of the Royal College of Physicians of both Ireland and the United Kingdom, Officer of the Most Venerable Order of the Hospital of St. John
