

SIMON FRASER UNIVERSITY

Not one to harbour innovation, Dr. Webb provides the greatest gift one can: he shares his work with the world by travelling to countries far and wide to train other cardiac teams.

He also launched a Virtual Teaching Laboratory that broadcasts live operations with the benefit of two-way communication with Dr. Webb's cardiac team. Today, patients all over the world owe their current lives and future happiness to his great work and willingness to share his expertise.

Fuelled by a potent mix of curiosity and conviction, John Webb has made a significant and lasting impact on medical science.

Madam Chancellor, on behalf of the Senate of this University, I ask now that you confer the degree of Doctor of Science, *honoris causa*, on Dr. John Webb.
