

Food Manufacturing

Status: Filled

Group Members: Gurmesh Sidhu, Edward Chiang, Gabriel Soares, Sumreen Rattan

Sponsor(s):

Supervisor(s): Amr Marzouk, PhD, PEng, Lecturer, Mechatronic Systems Engineering

Project Description

The Problem :

Manufacturing in a broad aspect is lacking integration of modern technology and relies on repetitive human interactions. As robotics, AI, and other emerging technologies improve industries such as automotive manufacturing, we would like to create a solution for one of the largest markets in the world. The restaurant industry alone has a market cap of \$14.68 Billion a

Finally in Japan, in a nation where vending machines are a norm, products such as regular soft drinks, groceries and even a fully cooked meal can be bought. In the case of a cooked meal, the vending machine would cook the food fresh, rather than the food being premade.
