

Recommendation for establishing co-authorship for papers originating from SIAT graduate classes

Graduate Chair's Recommendation

GPC supported the Grad Chair in publishing this recommendation on April 20, 2011

The criteria for co-authorship are not cast in stone and differ between disciplines. In general, the following three areas are considered essential to establish the claim for one becoming a co-author:

1. Conceptual aspects of work/ideas
2. Performing research
3. Interpreting results and writing

Typically a contribution into all three aspects is expected in the research

publishable outcome, to
establish a claim of

following process.

1. Typically the instructor contributes to the conceptual aspects by providing guidance and feedback on the proposed course project.
2. A student performs the work, quite often with a feedback provided within the
