

STAT 201
Statistics for the Life Sciences

Spring 2008
Day Course
Statistics Workshop

The Basic Practice of Statistics, 4th Edition, by David S. Moore, W.H. Freeman Publishers

Calendar Description:

An introductory course in research methodology and associated statistical analysis techniques for students with training in the life sciences. **Quantitative**

Outline:

Aimed at a non mathematical audience, this course discusses procedures that are most commonly used in the summary of statistical surveys and in the interpretation of experimental data. Either STAT 101 or STAT 201 is a satisfactory prerequisite for STAT 302.
