

# STAT 403

## Intermediate Sampling and Experimental Design

Spring 2011  
Day Course

---

Students requiring accommodations as a result of a disability, must contact the Centre for Students with Disabilities 778-782-3121 or csdo@sfu.ca

---

Instructor: Dr. Steven Thompson

Prerequisite:

STAT 302 or 350. Students with credit for STAT 410 or 430 may take STAT 403 for further credit. Statistics minor, major and honors students may not use this course to satisfy the required number of elective units of upper division Statistics. However, they may include the course to satisfy the total number of required units of upper division credit. Intended to be particularly accessible to students who are not specializing in Statistics

Textbook:

There is no formal text assigned to this course. Necessary course materials will be provided online.

Calendar Description:

A practical introduction to useful sampling techniques and intermediate level experimental design. Quantitative.

Outline:

This course covers the basic and most useful methods of sampling and experimental design. These methods are major
