

*Students requiring accommodations as a result of S3 UC2 statistics*

**Instructor:** [Dr. Tim Swartz](#)

**Prerequisite:**

STAT 330 and STAT 350.

**Textbook:**

No textbook required.

**References:**

*Bayes and Empirical Bayes Methods for Data Analysis* (Carlin & Louis)

*Bayesian Data Analysis* (Gelman, Carlin, Stern & Rubin)

**Calendar Description:**

The Bayesian approach to statistics is an alternative and increasingly popular way of quantifying uncertainty in the presence of data. This course considers comparative statistical inference, prior distributions, Bayesian computation, and applications.

**Outline:**

**1. The basics:**

the Bayesian paradigm  
comparative statistical inference

**2. Priors:**

conjugate priors  
prior elicitation  
reference priors  
improper priors  
discrete mass priors

**3. Computations:**

quadrature  
importance sampling  
Markov chain Monte Carlo

**4. Other topics:**

testing via Bayes factors  
interval and point estimation  
elementary decision theory  
hierarchical models  
Dirichlet process

**5. Applications:**

**Grading Scheme:**

Assignments – 20marks

Midterm 1 – 15marks

Midterm 2 – 15 marks

Final – 50marks
