In the Spotlight

The Science Spooktacular is an annual event for kids in grades K-6 and their families presented

This six-week, part-time training program offers foundational data science and AI concepts that can be directly applied to your work and organization.

Designed and taught by leading data science and AI experts at Simon Fraser University, this training program enables emerging leaders from industry and government to develop data science and leadership skills. Through this outcome-focused experiential training program offered by SFU's Big Data Hub, you will tackle a valuable business problem for your current employer or for a partner organization while gaining an introduction to all aspects of a data project workflow. You will come away with relevant knowledge, training, and a high-quality data project ready for field trial and implementation at the end of the program. **Register [here](#).**

Oct 28-31: oSTEM Conference

The oSTEM Conference returns again this year in a virtual format. This conference is a space for LGBTQ+ students and professionals in STEM fields to share their experiences and learn from one another. They have programs ranging from safe spaces to talk about queer issues to discussing the latest in research conducted by our members. **Register [here](#).**

Oct 29: Accessible Course Design - Separating Content From Delivery

The pandemic has taught us the importance of planning for flexibility. While respecting the integrity of content, facilitator Dr. Richard Jackson will describe how he designs coursework for face-to-face, flipped, blended, or fully remote delivery with Universal Design for Learning principles in mind. **Learn more [here](#).**

Call for Speakers - CCWESTT

The 19th biennial CCWESTT (Canadian Coalition of Women in Engineering, Science, Trades And Technology) conference will be held May 12-14, 2022 in Halifax, Nova Scotia. The theme of the 2022 conference is Reach for the Stars: Creating Impact Together, and they are looking for speakers! The 2022 conference will to advance the overarching goal of full participation of women at all levels in SETT (Science, Engineering, Trades and T

In this episode, Major Jessica Ross gives us a glimpse into the Canadian Armed Forces and her life therein - how she joined, how it was to train to get to where she is today, and where she's going. She tells us all about her experience at the Royal Military College of Canada, how the work she did during her master's studies in applied science is bettering the world and Canada, and how Dungeons & Dragons can be applied to team dynamics. Plus, you'll hear just how important hockey is in the military. **Listen to this episode [here](#).**
