

Department of Molecular Biology & Biochemistry

MBB 490-2

Directed Study in Advanced Topics of Biochemistry

Directed reading in a topic of molecular biology or biochemistry chosen in consultation with a supervisor. The course will include the preparation of a term paper on the chosen topic. Prerequisites: MBB 231 and usually upper level standing with at least 60 semester hours in an MBB major, minor or honours program and permission of the MBB department.

- Find a faculty member willing to supervise you in this course.
- The faculty member will prepare a written proposal stating the nature of the directed readings topic (approx. 1 page long). Please attach proposal to this form.
- You should submit your advising transcript and this application form to the MBB office by the last day of exams of the semester preceding this directed readings course.
